

Press release

**CY4GATE HAS BEEN AWARDED NEW CONTRACTS WITH A TOTAL VALUE
OF ABOUT € 10 MILLION FOR SOLUTIONS IN DECISION INTELLIGENCE FOR LEADING FOREIGN
INSTITUTIONAL CLIENTS**

Rome, November 11, 2024 - **CY4GATE (CY4.MI)**, national and European player in cyber security and cyber intelligence, signed in recent weeks two contracts worth a total of about € 10 million with leading institutional customers for the acquisition of solutions in the Decision Intelligence field and for a duration of three years.

The contracts refer to the provision (a) of a Data Fusion Center, based on Quipo technology, which exploits the potential of using various Artificial Intelligence techniques and related proprietary technologies. The Quipo will be verticalized to the specific needs of the client, to integrate several very heterogeneous data sources and to provide decision makers with those summarized information elements that allow timely adoption of expert decisions with the lowest level of risk and (b) of a substantial package of evolutions of the Decision Intelligence platform for institutional use.

Both programs, multi-year and on foreign institutions, have enabled the opening of business on new customers with whom further upselling initiatives will be launched.

The diverse portfolio of products and technologies, versatile and adaptable to multiple cyber needs, is a decisive factor in the company's success in international markets, which, combined with the deep expertise gained in verticalizing the mentioned technologies to the specifics of each customer, makes the customer proposition particularly differentiating and the basis of the competitive advantage that Cy4Gate has been able to develop over the years.

Emanuele Galtieri, CEO and General Manager of Cy4Gate Group, stated: *"I am particularly pleased with these relevant contracts, not only because of the economic value, but also because of the value of the technologies required that have seen us prevail over our competitors. These are programs that have enabled us to penetrate new geographies, which I am sure will provide value generation opportunities for other product lines of the company as well. We are, in addition, generating backlog for future years and, thus, leading the company on a gradual path of business deseasonalization that within another two years, with the support of the Defence and Corporate business, will be fully accomplished."*
