

## Press Release

### **CY4GATE WINS A 3-YEAR CONTRACT WITH A TOTAL VALUE OF APPROXIMATELY € 20.5 MILLION FOR DECISION INTELLIGENCE SOLUTIONS FOR A EUROPEAN INSTITUTIONAL CLIENT**

Rome, 07 March 2025 - **CY4GATE (CY4.MI)**, a national and European player in cyber security and cyber intelligence, has signed a **contract with a total value of € 20.5 million**, with a **duration of three years**, with an **important European institutional client**. The agreement **includes the supply of technologies and evolutions in the field of Decision Intelligence**, with the aim of supporting complex decision-making processes through innovative and high-performance tools.

The contract includes the supply of advanced technological solutions developed by Cy4Gate in the **Decision Intelligence** field, a sector in which the Group continues to strengthen its role as a reference player. In a global context characterized by increasing complexity and interconnection, the demand for fast, precise decision-making processes based on in-depth analysis is constantly increasing. The ability to acquire, process and transform heterogeneous data into strategic insights is today an essential element for the success and competitiveness of institutions, companies and government organizations.

The agreement represents a tangible confirmation of the market's trust in Cy4Gate's cutting-edge technologies and in the strategic value of its proprietary solutions, designed to address the emerging challenges of big data management and informed decision-making processes. The **Decision Intelligence** market is recording significant growth in Europe, driven by the growing need for advanced tools for data analysis and strategic decision support. In this scenario, companies and institutions are accelerating the adoption of these technologies to increase operational efficiency and crisis management in increasingly complex scenarios.

**Emanuele Galtieri, CEO and General Manager of Cy4Gate Group**, stated: *"It is an important recognition, moreover, with a multi-year duration, confirming the company's work that meets the expectations of end users and opens up new opportunities. The management's effort is focused on progressively reducing the seasonality of turnover, acting on multiple leverage, including the acquisition of contracts that go well beyond the year of delivery, thus capable of feeding a solid backlog from which a constant flow of revenues descends. All this is made possible thanks to the continuous improvement of proprietary technologies that are now able to meet particularly challenging requirements in the management and correlation of huge amounts of data to be transformed into valuable information for decision-making purposes".*
