

## Press release

### **CY4GATE AND REDCARBON SIGN A PARTNERSHIP AGREEMENT IN THE FIELD OF ARTIFICIAL INTELLIGENCE FOR THE DOMAIN OF CYBER SECURITY**

Roma, 27 January 2025 – **CY4GATE (CY4.MI)**, national and European player in cyber security and cyber intelligence, and **REDCARBON**, a rapidly growing company on the European scene that operates in the field of cyber security by applying Artificial Intelligence to Cybersecurity solutions, announce that they have signed a partnership agreement.

The two companies will develop a collaboration that will hinge on the capabilities and know-how of both players to apply dedicated Artificial Intelligence and Machine Learning algorithms to further strengthen Cy4Gate's already technologically advanced cyber defense solutions.

In a context where attacks are not only growing in number and severity, but also in complexity and therefore difficulty in being identified and neutralized, the adoption of Artificial Intelligence algorithms aimed at enhancing detection and response capabilities are an indispensable ally for the strengthening of cyber resilience: this element of the application of AI in cyber security, which Cy4Gate has been integrating for some time now and which in recent years has garnered the company several awards and mentions from Gartner® precisely in Composite AI area (the so-called composite Artificial Intelligence).

The agreement, which does not provide market exclusivity, represents the completion of a further step forward in the strategy of both companies to consolidate know-how on the topic of algorithms based on Artificial Intelligence and applied to the cyber domain.

\*\*\*

**Emanuele Galtieri, CEO and General Manager of Cy4Gate Group** commented: *“The partnership with RedCarbon, a company that shares our vision of a safer future thanks to the use of Artificial Intelligence, will give a further boost to the evolution of defense products thanks to AI. In a context in which cyber threats must be addressed according to a holistic approach and with the support of various stakeholders, sharing technological know-how will allow us to offer cyber security solutions that are always in line with the evolution of the threat. We are confident that this collaboration will allow us to successfully face future challenges and continue to be a point of reference in the cyber security sector.”*

**Fabrizio Rosina, CEO of RedCarbon** added: *“We are excited to partner with Cy4Gate to further expand our market presence and offer businesses advanced protection against cyber threats by leveraging the power of AI. Our AI-based CyberSecurity solutions are designed to analyze and respond to growing threats in real time, allowing companies to effectively counteract the enormous amount of cyber attacks. Cy4Gate, with its vast network of contacts and deep knowledge of the Italian market, will be a precious ally for RedCarbon in bringing its advanced AI solutions to the Large Business and Public Administration markets. This partnership marks the beginning of a new era of growth and success for both companies.”*

**About CY4Gate S.p.A.**

The Company was founded in 2014 to meet an unconventional demand for cyber security. Listed on Euronext Growth Milan in June 2020, CY4Gate S.p.A. has also been listed on the Euronext Milan Star segment since June 2023. CY4Gate S.p.A. was conceived to design, develop and manufacture technologies and products, systems and services that meet the most stringent and modern “Cyber Intelligence & Cyber Security” requirements expressed by Law Enforcement Agencies, Armed Forces, Institutions and Companies, both at home and abroad. Representing a unique Italian industrial project, CY4Gate S.p.A. operates in all facets of the cyber market, with proprietary products that meet both information collection and analysis and security needs: QUIPO and AMICO in the world of Cyber Intelligence along with RTA, Diateam, CTI and Pronto Cyber in the world of Cyber Security

**About RedCarbon:**

Company founded in 2020 by professionals with twenty years of experience in the Cybersecurity business. Creator of the first Virtual Analyst, Red Carbon aims to revolutionize the approach to Cybersecurity management by offering different instances of Artificial Intelligence to reduce incident response times, allow human beings to carry out more qualifying tasks, reduce the impact of turnover to companies operating in this sector and optimize the investments already adopted on the security perimeter. With these all-proprietary solutions, Red Carbon presents itself as an international and cutting-edge reference leader to support Partners and Customers in countering the ever-growing cyber threats.
